Always
use the
original!

- ✓ tested by independent institutes
- ✓ legally & officially impeccable

SPÜLBOY NU® Line offers maximum mobility and flexibility across bars, restaurants, cafés, and event operations. The system requires no electricity or plumbing, and uses significantly less water than traditional manual glass washing. Each glass is cleaned in just 5-8 seconds, with a cold water rinse that ensures it is beer-ready immediately.

Includes: 1x glass washing tablets, 1x brush sanitizer power, 1x water inlet pipe, 1x drain pipe

NU on Tour® glass cleaning stations

NU on Tour® A STAR module glass clean

Stainless steel counter with cut-out for SPÜLBOY NU® device

NU on Tour® A STAR add-ons

Modular design with connecting pieces & storage areas

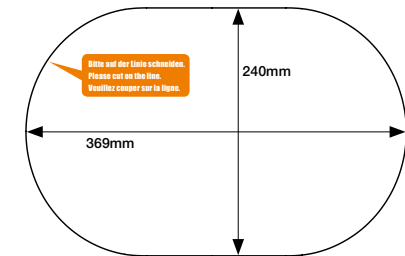

NU on Tour® pickup table water+

Folding table with 1 NU® water+, inlet and outlet hose

The **NU on Tour® A STAR** is a compact, portable glass-washing station designed for high-mobility service environments such as catering setups, outdoor events, festivals, and mobile bars. Built for flexibility, the unit integrates a dedicated cut-out for the NU® standard glass washer along with an additional sink space for

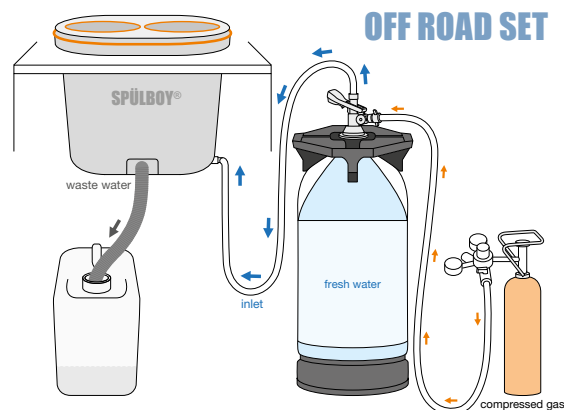

rinsing or auxiliary washing. Its smart, space-efficient design allows professional glass cleaning anywhere – without permanent plumbing infrastructure. Durable, practical, and easy to deploy, it ensures consistently clean, beverage-ready glassware wherever your service takes you.

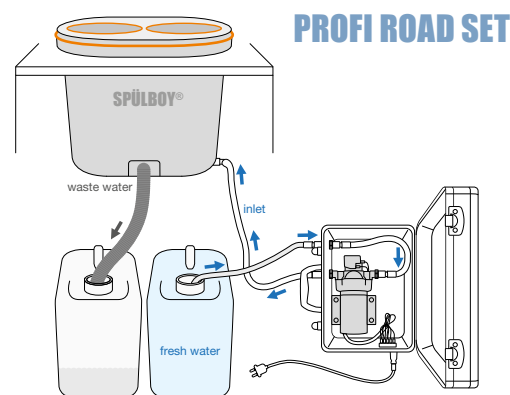

Template for NU® cut-out

Aqua Management

independent with **compressed gas**

like a pro with an **electric pump**

NU on Tour® operates in two convenient ways – either with a pump connected to a water can or via a CO2 cylinder and keg system, ensuring reliable water flow even where plumbing is unavailable.

The **NU on Tour® complementary set** with electric pump is a powerful companion for professionals who are travelling to trade fairs or events. The pump ensures constant water pressure and a flow rate of 9.5 litres/min at 3.4 bar when rinsing.

No water, no electricity, simply practical without a compressed gas bottle. Connect the hand pump to the included hose and the Keg combination tap head. Simply and easily pump air and you can dispense and use your SPÜLBOY® at the same time.
